MC Dress Up

Updated March 1st 2025

Product Overview

Thank you for purchasing a MoCap Central animation pack! We take pride in capturing and processing our data to the highest quality by adding details such as finger motion and ensuring smooth start/end poses. All clips use the Unity Mecanim Humanoid system so the animations play back on any Unity Humanoid compatible character.

MC Unity Character

The **rig_MCUnity** character contains a Unity compatible skeleton with fingers, eye and jaw bones. Its Rig > Animation Type is set to Humanoid.

Demo Scenes

The package includes a demo scene **Scene_Demo_MAIN** file to review the animation clips. You can also view the animated objects such as the chair being moved by the character.

Demo Animation Controllers

Each animation set has a demo animation controller so during runtime you can right-click on a state in the Animator window and select **Jump to State** to see it play on the MC Unity character.

Props

There's a template Gun, Rifle and Sword model prop in this pack.

Objects

None

Root Bone

The animations use the 'root' bone to ensure easy alignment of the character to an object such as the Dumpster
